Configuring Mini VCI to work with Windows 10

After I installed the software, my Windows 10 didn't recognized the Mini VCI driver. The installation CD included "MVICI Driver for TOYOTA.msi", but when trying to install, I received this error:

Setup ended prematurely because of an error. Your system has not been modified. To Install this program at a later time, please run the installation again

To fix this, I had to extract the file "MVICI Driver for TOYOTA.msi" using 7zip or the [msiexec](#) command.

Extract MSI

After the extraction, copy all files to the folder: “C:\Program Files (x86)\XHorse Electronics\MVCI Driver for TOYOTA TIS”. Copy IT3System.ini and IT3UserCustom.ini to “C:\Program Files (x86)\Toyota Diagnostics\Techstream\Env”

To install the drivers:

right click on ftdiport.inf & ftdibus.inf and install. To verify open “FirmwareUpdateTool.exe” and click on Device info, it should say connected.
